PROFESSIONAL SUMMARY

Results-driven Full Stack AI Developer and UI/UX Engineer specializing in production-ready machine learning platforms and cinematic frontend architectures. Adept at bridging complex backend AI systems (LLMs, RAG, Python/Flask) with intuitive, high-performance web interfaces (React, GSAP, Framer Motion) to deliver scalable, user-centric digital products.

EDUCATION

- **B.Tech in Computer Science and Engineering** — Vishnu Institute of Technology CGPA: 9.18
Aug 2024 – May 2028
- **Intermediate (MPC)** — Tirumala Junior Kalasala 92.1%
June 2023 – May 2024

TECHNICAL SKILLS

- **AI & ML:** Agentic AI, LLM Fine-Tuning (LoRA), RAG Architecture, NLP, Semantic Search, Deep Learning, Generative AI (Gemini)
- **Programming:** Python, Java, C, SQL, JavaScript (ES6+), HTML5, CSS3
- **Frontend & UI/UX Design:** React.js, Tailwind CSS, GSAP, Framer Motion, Figma, Interactive Prototyping, Skeuomorphism, Design Systems
- **Backend & APIs:** Flask, REST APIs, Node.js, SQLAlchemy
- **Architecture & Tools:** Git, GitHub, VS Code, CI/CD, SQLite, Pandas, NumPy, CUDA Memory Management, Responsive Design

EXPERIENCE

- **AI Engineer & UI/UX Developer Intern — OrionAC** Feb 2026 - May 2026
Architected and developed the cinematic frontend interface for the Orionac Research Lab, utilizing advanced GSAP and Framer Motion to create a highly immersive Solar System hero section and an interactive Global Research Map. Researched and developed cognitive systems targeted at enterprise autonomy and solving the AI reasoning gap by fine-tuning LLM architectures utilizing LoRA adapters. Architected AI-integrated Flask applications with low-latency RESTful APIs to serve complex models in production environments. Bridged complex AI reasoning capabilities with intuitive, accessible frontend dashboards to optimize user workflows.

PROJECTS

- **CrackAI — Adaptive AI Learning Platform**
Built a full-stack intelligent learning platform utilizing Gemini 2.5 Flash and custom NLP pipelines to dynamically generate topic-wise questions. Designed RESTful Flask APIs and SQLAlchemy models to manage user progress and content, implementing an analytics dashboard to track performance. Reduced manual curriculum generation time by 40% while tracking student performance via SQLAlchemy-backed real-time analytics. *Tech: Python, Flask, Gemini API, NLP, React, SQLAlchemy*
- **Lawbby — AI Legal Intelligence System**
Developed a high-volume semantic search platform over legal documents, replacing keyword-only retrieval with cosine-similarity algorithms. Connected a scalable indexing pipeline to a minimalist frontend, enabling fast, cosine-similarity based semantic search with a focus on user accessibility. Cut average case lookup times by 30% through optimized backend data processing for scalable indexing and retrieval. *Tech: Python, NLP, Machine Learning, Flask, Semantic Search*
- **Bronn — Interactive Brand Landing Page**
Engineered a high-performance, visually immersive landing page focused on conversion optimization and brand storytelling (Live Demo). Integrated smooth scroll interactions, modern typography, and dynamic visual hierarchies to significantly reduce bounce rates and drive user engagement. *Tech: Frontend Development, UI/UX Design, CSS Animations, Responsive Architecture*
- **Offline-First RAG Navigation System**
Architected a localized, offline-capable tourist application featuring RAG-based search and modular map data storage. Engineered the system to operate entirely without external databases for maximum privacy, successfully optimizing local data retrieval within a strict 5-6 GB constraint. *Tech: Local RAG, Python, SQLite, Embedded Systems*

CERTIFICATIONS & ACHIEVEMENTS

- **Smart India Hackathon** — National Top 50 Finalist
- **Artificial Intelligence Specialization** — Coursera (Focus: Content Creation, Data Analysis, Communication, Research & Insights)
- **CSS Web Development Certification** — HackerRank
- **Adobe India Hackathon** — Participant
